

# K31D

**Facial / Card / QR / Mobile Access**

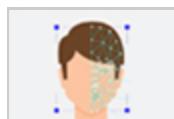

## Introduction

K31D provides contactless authentication methods such as Facial/Card/QR/Mobile reader. K31D is slim and compact design and Less wiring and quick installation through Wi-Fi and POE+ support.

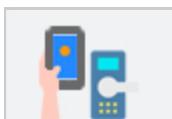

This model took its facial recognition technology to the next level, with high-tech edge device that can run AI algorithm locally. It uses an NPU, or Neural Processing Unit, to maximize the performance of its AI engine and offers the highest standards in facial recognition accuracy and speed.

## Features

- 2MP Dual Camera, Live Face Detection (Anti-spoofing)
- Mobile Access
- EM/HID iCLASS/MIFARE/HID Prox/DESFire/Barcode and QR code
- Power over Ethernet+

Facial

Mobile Access

IP65

IK06

## Specifications

### Face Capacity

50,000 Faces

### Card Capacity

100,000 Cards

### Transaction Capacity

5,000,000 Transactions

### Authentication

Facial/Card/PIN/Mobile

### Network Interface

TCP/IP, USB, WIFI (Optional)

### Display

5.5" Touch LCD Screen

### Operating Voltage

12V 2.5A

### Size

82.5 x 171 x 23.4 mm (WxHxD)
