

# FC09

Works well with *Time & Leave 360*

## Introduction

Flick FC09 is a unique and versatile scanner. Equipped with our latest facial identification algorithm, it is able to verify a person's fingerprint in less than one second. The machine can be customised to be used with our in-house program to expand its functionality. Clients can simply plug our reader into their PC (or a retail POS system) and it immediately transforms the PC into a Time clock, which allows their workers to start clocking in their attendance on the PC.

## Features

- High Performance fingerprint sensor
- Rugged sensor technology
- Versatile & Reliable
- Robust ABS plastic structure
- Easy installation & Operation
- USB interface for data transfers
- Removable stand
