

# FC14-D

## Introduction

FC14-D is a time attendance and door attendance machine with a built in 4-in-1 biometric authentication functionality, allowing the user the option to clock their attendance by face, fingerprint, card or password. With its infra-red night vision, users can also scan their faces to clock their attendance in complete darkness.

With its full colour user interface, it provides the user ease of use for setting up of machine and enrolling of new workers.

## Features

- New framework firmware, easy to extend functions and customize client's requirements
- Able to detect whether the face is an actual face or a photo, enhancing the security level of verification
- One face template is registered to one user

USB Download

Facial/Finger/PIN
